١.	The following information is based on statements made shortly before 10
	Mayorher 1946 by Domingo Cirici Ventallo, who is employed in the Seccion
	de Incidencias de Liberted Condicional (section relating to the granting
	of conditional liberty to prisoners) of the Spanish Ministry of Justice.
	Domingo Cirici is the brother of Maties Cirici Ventallo, London corre-
	spondent of Madrid.

- 2. Reportedly, the files relating to conditional liberty granted prisoners are very disordered. Cirici mentions such irregulatities as the authorisation of pardons to prisoners who have already been shot and the negligence of prison directors to send papers to the Junta of Conditional Liberty when a prisoner should be released. He cites as an example the case of an inmate of the prison of Burgos who, in spite of the fact that he should have been released more than a year ago, is still inscarcerated because the director of the Burgos prison did not send his papers through to the Junta of Conditional Liberty.
- 5. In connection with prisoners who have served their terms but are still imprisoned because of the failure of the authorities to transmit their papers, Cirici states that he proposed a formula for the solution of the situation to the Director General of Prisons. However, according to Cirici, the Director General was not interested in the proposal.
